

CALIBRATED ROLLS

We offer you **manufacturing of calibrated rolls for tube producers**. We have a great experiences with production of these calibrated rolls for a long-time. We recommend quality material cast iron of type B 10 or CrNiMo480, hardness of calibrated rolls is 530 HV (min. roughed diameter) and 400 HV (max. roughed diameter). Clamping bushes of calibrated rolls are open for modify and vary depending upon the type of use and particular customer's demands.

Max. diameter of calibrated roll is 800 mm, bigger after discussion. Technical parameters are open for modify depending on wishes and requirements of customers.
